

Yerik International: Discovery Call MOM

Sep 29, 2026 · @Lovish Kalani

Meeting details

Disha walked Rajveer through Yerik's Online Presence Report (OPR). The call ended with a request for a proposal covering the website and LinkedIn.

Item	Detail
Client	Yerik International, Doraha, Ludhiana (tractor and agri machinery parts)
Meeting type	OPR walkthrough and discovery call, video with screen share
Call date	Week of 28 Sep 2026 (exact date to confirm)
Giraffe Partners	Disha Arora (presented the OPR)
Yerik International	Rajveer Singh, Manager
Outcome	Giraffe sends a website and LinkedIn proposal within 2 days of the call

Summary

Rajveer wants an updated website live before a November exhibition, plus a cleaner LinkedIn presence. He does not want marketing campaigns or a branding overhaul right now.

Where Yerik stands today

- Capacity is full, even after recent infrastructure upgrades. Yerik is not chasing new leads and is trimming customers who no longer fit.
- No budget is allocated for marketing. Any spend needs management approval, and our proposal is what he will take to them.
- The website is about 10 years old. Product ranges are still relevant, but the new infrastructure and progress are missing.

- The site sits on a local Ludhiana server that he considers insecure. The domain is tied to that host.
- He is open to building a fresh website, and his team will coordinate content.
- Monarch Yerik Hydraulics is out of scope. It is now a JV with a Canadian company, under separate management.

Deal stage: proposal requested, budget not yet approved. The decision depends on management sign-off and the hosting check by his IT team.

How to frame the proposal: get the website ready before the November show. Do not sell it as lead generation; he said clearly that he does not need more leads.

Discussion points

The OPR's core finding landed: online, Yerik looks static, and a visitor cannot tell if the business is growing or even active.

What Giraffe presented

Area	Finding shown on the call
Website (2/10)	Site dates from 2015-16. The phone number is unreachable. An enquiry sent through the site about 10 days before the call got no reply. Logos are outdated.
Messaging	No headline or clear message. Buyers, job seekers and investors cannot tell where to go. The mobile view is weaker than desktop.
Product pages	No product details. A stray "tweet" label appears with no clear purpose.
Google	Profile exists and shows in search, but photos are irrelevant and some videos lower trust.
Competitors	JRS Farm Parts states "ISO-certified tractor parts supplier in Ludhiana, exporting to USA" in its first line. Machine Parts has a clear tagline and a working WhatsApp chat button.

Area	Finding shown on the call
LinkedIn	Three pages found: two under Yerik International and one for Monarch Yerik Hydraulics. It is unclear which is the parent.
Hiring posts	AI-made graphics that do not match the brand colour (orange) or font. A fake hiring post would be hard to tell apart.
Careers form	Accepts an invalid email and a blank phone number. No validation on any field.
Expo readiness	An expo costs at least ₹4–5 lakh. Visitors who check Yerik online afterwards may drop off if the site does not build trust.

Rajveer's responses

- Monarch Yerik Hydraulics is a JV with a Canadian company and manages its own brand. Interest is only for Yerik International.
- There is no compelling need for marketing. Capacity is full and existing customers are being trimmed.
- He wants the website updated with accurate, current information, and the new infrastructure highlighted.
- He asked about Giraffe: team, locations and way of working. Disha shared the offices, founder profile and the Neev Seeds case study.
- A physical meeting with Giraffe's founder was offered. He did not take it up.

Decisions made

The first phase is the Yerik International website plus LinkedIn, delivered in 30 days, ahead of the November show.

1. Scope is Yerik International only. Monarch Yerik Hydraulics is excluded.
2. Phase one covers the website (a fresh build is acceptable) and LinkedIn profile improvement. No marketing campaigns or branding overhaul for now.
3. Website timeline is 30 days, not the 7–8 day one-pager first suggested. Target: live before the November exhibition.

4. Giraffe sends the proposal within 2 days of the call. Yerik will pick the items it needs from it.
5. Yerik's team coordinates content with Giraffe.
6. Yerik's IT team handles the hosting move and the domain check.

KPIs

Two sets: deal KPIs show whether this closes in time for the November show; project KPIs are what the proposal should commit to, measured against today's OPR.

Deal KPIs

KPI	Target	Owner	Status
Proposal sent (scope, cost, timeline, Yerik's inputs)	Within 2 days of the call	Giraffe (Disha)	In progress
OPR report shared with Rajveer	Same day as the call	Giraffe (Disha)	▼
Hosting and domain status confirmed	Before the proposal follow-up	Yerik IT, via Rajveer	Waiting on client
Management budget approval	In time for a 30-day build	Rajveer	Waiting on client
Go-ahead to start	At least 30 days before the show	Rajveer	Waiting on client

Project KPIs (for the proposal)

KPI	Today (baseline)	Target at launch
Website First Impression (OPR D01)	2/10	8+/10 on re-audit
Communication Clarity (OPR D02)	1.5/10	8+/10 on re-audit
Phone number on website	Unreachable	Connects, named owner, tested weekly

KPI	Today (baseline)	Target at launch
Website enquiry reply time	No reply after about 10 days	Reply within 1 working day
Careers and enquiry forms	Accept blank and invalid entries	Required fields validated, spam check on
Homepage headline	None	One line: what Yerik makes, for whom, since 1991
Product pages	No descriptions	Priority products described (count agreed with Yerik)
Mobile view	Weaker than desktop	Checked on phone before launch
Hosting	Local Ludhiana server	Secure hosting, domain retained
LinkedIn	Three pages, parent unclear, off-brand hiring posts	One clear Yerik International page, on-brand posts
Launch	Not live	Live before the November show

The 8+/10 targets are proposed. Confirm them in the proposal before sharing with Yerik.

Next steps

The proposal is the critical path: it goes out within 2 days of the call, and Rajveer needs it to seek budget approval.

Giraffe Partners

- ☐ Send the OPR report to Rajveer, as promised on the call (Disha, immediately)
- ☐ Lovish reviews the proposal before it goes out (Disha, before sending)
- ☐ Send the proposal: website rebuild and LinkedIn cleanup, with scope, cost, timeline, and what Yerik must provide (Disha, within 2 days of the call)
- ☐ Attach the full services list so Yerik can pick what it needs (Disha, with the proposal)
- ☐ Send the LinkedIn audit form (Disha, with the proposal)
- ☐ Book a follow-up call to walk through the proposal (Disha, 2 days after sending)

Yerik International

- ☐ Check with IT whether the domain can move off the local Ludhiana host (Rajveer, before the follow-up)
- ☐ Share the November show name and date (Rajveer, at the follow-up)
- ☐ Take the proposal to management for budget approval (Rajveer, after receiving it)
- ☐ Name a team coordinator for website content (Rajveer, at go-ahead)

Next meeting: proposal follow-up call, about 2 days after the proposal is sent. Date to be fixed.

Open issues and internal notes

The November show date is the biggest unknown: without it, the 30-day timeline has no fixed start.

Open issues

- November show name, date and venue are not known yet.
- The approver above Rajveer is not named. We do not know who signs the budget.
- The domain is tied to the local host. Moving it may need that vendor's cooperation.
- The website enquiry went unanswered for about 10 days. Confirm who monitors that inbox before launch.
- Two LinkedIn pages carry the Yerik International name. Confirm which one is official.

Internal notes (remove before sharing with Yerik)

- **Drop the "10% to 20% conversion" line.** It was said on the call, but Giraffe does not promise leads or growth. Rajveer also said he does not need more leads. Frame the value as enquiries they already get converting more easily.
- **Use one company figure.** The call cited both "50 to 100 companies" and "around 100 companies". Pick one verified number for the proposal.
- **Do not feature Monarch Yerik on the new site by default.** Rajveer treats it as a separate brand under the JV partner. Ask before mentioning it.
- **Reword the form point.** On the call it came out as needing "@gmail.com for business mail". The real point is field validation; business email should sit on Yerik's own domain.
- **Price in phases.** Website first, LinkedIn as an add-on. He said he will pick items, and there is no marketing budget today.

- **Hosting help.** Disha offered to handle the move. Confirm scope and cost in the proposal rather than leaving it open.

Corrected transcript

Names, speaker labels and spellings are corrected ("Yaric" and "Geric" are Yerik), recording markers and one repeated passage are removed. Wording is otherwise kept as spoken.

Part 1: OPR walkthrough

Disha Arora: Hello?

Rajveer Singh: Hello ma'am.

Disha Arora: Yeah, let me share my screen, sir. So, this is one report that I've made... Just make sure that my voice is audible and my screen is visible? Hello?

Rajveer Singh: Yes, yes.

Disha Arora: Okay. Toh sir, this is one report that I've made called "Online Presence Report". Basically, isme hum check karte hain ki ek brand ki, ek manufacturing company ki online presence kaisi hai: uski website, uska Google profile, uske client ke perspective se, potential client ke perspective se, aur ek investor ke perspective se. Har ek point se woh kaisa dikhta hai.

This is one brief report that I've made, and I will be sending you this report right after. You can go ahead with checking it briefly.

Let me start. As of now, mujhe lagta hai ki market humein kaisa dekhta hai. If I may open the website as well...

[Disha opens the Yerik International website]

Toh mujhe lagta hai ki there are some points, and there are some loopholes. First of all, jab main is website ko dekh rahi hoon, toh mujhe as a first-time viewer aisa lag raha hai ki yeh company static hai. Iski growth hui hai ya nahi hui, I am not sure.

For example, one major flag is that the number mentioned on your website is not reachable. So, from the perspective of a client, a potential client, an investor or a business partner, anyone relevant to your industry is not able to reach you, because the number is outdated and it is not working. Right?

Kyunki yeh ek 2015–2016 ki website hai, toh mujhe yeh nahi pata chal pa raha ki kya yeh website abhi working hai, kya yeh business abhi working hai ya nahi. Woh mujhe kahan se pata chal raha hai, woh I will be telling you.

Basically, maine aapko har ek perspective se kuch points diye hain: website se, communication se, Google se, everything. Right?

Website mein maine aapko 2 diye hain, iska reason main bata deti hoon. First of all, there are a lot of outdated things. Doosra, hum yeh dekhte hain ki website pehle teen-chaar second mein kya convey kar rahi hai? Kya website acche se load ho rahi hai? Kya website ka mobile view acche se aa raha hai ya nahi? Toh har ek user ke perspective se dekha jaata hai.

Abhi main dekh rahi hoon kaafi saare logos outdated hain, yeh number working nahi hai. And maine around 10 din pehle website se ek inquiry send ki thi, mujhe uska koi reply nahi aaya hai.

So, this is it. It's also a 2015–2016 website, and ek baar mein dekh kar pata nahi chal raha ki kya business hai and why it is credible. Right? Toh yeh point hai.

Doosra, mujhe yahan par yeh laga ki koi ek headline nahi hai, koi clear message nahi hai. Agar main ek person hoon jo aapki company mein job chahta hai, ya main investment karna chahti hoon, ya main aapka client hoon, toh mujhe nahi pata ki kis direction mein jaana hai. This is outdated, right? That's why.

Aur maine aapki competitor research bhi ki thi, woh bhi main dikhaungi.

Second, Google and buyer credibility mein I have given you 7 points. Kyunki maine check kiya, Google pe aapki profile toh hai, sir, right? Search karne par aa bhi rahi hai. But agar main photos par click karti hoon, toh irrelevant photos hain, and yeh dekhiye, kuch aisi videos hain jo credibility aur trust low karti hain.

Mera point sirf itna hai ki saamne wale ko aapki website dekh kar trust aa raha hai ya nahi? Right? Hello? Hope I am audible, sir?

Rajveer Singh: Haan ji, haan ji.

Disha Arora: All right. Iske baad maine aapke competitors research kiye hain, and these are two of your competitors. I have not attached the screenshots because I wanted to show you live which competitors I found and what I saw in them.

[Disha opens the competitor websites]

There are a lot more competitors, but for example, agar main is website ko open karti hoon, mujhe ek line mein pata lag raha hai: "ISO certified tractor parts supplier in Ludhiana, manufacturer and exporter to USA". Whereas hamari website mein yeh cheez end mein aa rahi hai.

Most log website phone mein kholte hain. Phone mein toh the UI and UX is much worse than this, and this can be improved and should be improved.

Similarly, this is one more website, iska naam hi Machine Parts hai. Isme bhi bohot saare improvements ho sakte hain, but we are not talking about that. Yahan par likha hua hai "offering solutions for farming machines", plus yahan WhatsApp ka option aa raha hai, "Chat on WhatsApp", jo working hai. So they can directly go ahead with that, and your lead is not going anywhere. Right?

For LinkedIn, maine check kiya hai ki LinkedIn par Yerik International ke name se ek account hai, ek aur account bhi Yerik International ka hai, and there is Monarch Yerik Hydraulics, which is your recent active business, I would say, jo mujhe sabse zyada research karne par mila. Toh mujhe teen companies dikh rahi hain. But wahan par mujhe yeh nahi dikh raha ki mother company kaunsi hai, kaunsi kis company ke under hai. So this is one confusion: kisko kahan follow karna hai.

[Disha searches for the company online]

Inka name bhi, sir, Monarch Yerik Hydraulics hi aa raha hai, and maine yeh bhi dekha ki around 5 mahine pehle isi company ne ek expo attend kiya tha. Right? Which is a good thing, active.

Mera main goal yeh dekhna hota hai ki your business is expo-ready. One line mein bolun, toh expo mein aapka kharcha jaata hai around 4 se 5 lakh minimum, right? Jab aap expo mein kisi potential client, customer ya founder se milte ho, kya woh ghar jaake aapko reach out karte hain? Woh aapki website dekhte hain, aapko call karte hain, ya sirf aapki company search karte hain. Jo offline reputation aapne build ki hai, kya woh online bhi justified hai, ya lead wahin toot jaati hai? Because they are not able to trust, or they are confused whether it is the right business, because there are so many basic loopholes that need to be taken care of.

Toh hum yeh check karte hain ki everything you have is expo-ready. Taaki next time aap expo mein ja rahe ho, you have the full confidence that someone searching for you online has full trust in you. The one word is trust.

Abhi dekhiye, yeh business mujhe yahan dikh raha hai, and isme bhi mujhe brand consistency nahi dikh rahi. Hiring ke liye AI-made graphics hain. That is fine from your end, but jo branding mujhe website par dikh rahi hai, orange colour, yeh font, woh yahan nahi dikh raha. So, agar koi aapki company ka sirf logo ya naam lekar khud ek post bana ke daal de ki this company is hiring, toh ek real career seeker differentiate nahi kar paayega ki kaunsa sahi hai. Right?

So this was another point. Phir maine aapse connect karne ki koshish ki, and this is your career page. Let's say my name is Disha, current location Punjab. Email mein basic hygiene yeh hai ki proper email address daalna padta hai, jaise @gmail.com. But agar main isme testing mein kuch bhi daalun, toh bhi yeh usko pick kar lega. Main number bhi nahi daal rahi hoon, 10 digits bhi nahi. Still it will pick it. Right? I think captcha required hoga, but captcha se bhi zyada yahan validation ki requirement hai. Yeh basic hygiene honi chahiye thi ki form irrelevant cheezein pick na kare. Matlab koi bhi yahan aakar kuch bhi daal raha hai aur woh aapke paas ja raha hai. That does not give the right credibility to your venture. So, if I do this... it still submitted.

Rajveer Singh: Yeah, okay.

Part 2: Scope, constraints and next steps

Disha Arora: Okay, so this is one very big loophole which I found. Ab mujhe kya lagta hai ki kis cheez mein humein work karna chahiye. First of all, humein ek consistent branding rakhni chahiye. Since we have worked with around 50 to 100 similar companies and made them expo-ready, we do have the expertise. Jab maine aapki company dekhi, I feel there are some basic things jo start mein fix honi chahiye: the right number, consistent branding everywhere, and every form working at least.

Toh mujhe lagta hai ki start mein ek full-fledged working, updated website honi chahiye. Homepage par products aur ek one-liner hona chahiye: what we are and what we do. So you get the relevant leads. For example, aap expo mein kisi se mile, you have spent a lot of money and time. But then they go to your website and see nothing relevant. Wahan gap badh jaata hai. Mera basic point yeh hai ki agar aap expo mein 10% bando ko convert kar rahe ho, main usko 10 se 20% tak lekar ja sakti hoon with my company. Right? So homepage humein sahi karna hai.

Rajveer Singh: Toh aap basically, jo main samajh pa raha hoon, you are trying to tell me that you will carry out these things for us, right?

Disha Arora: Yeah, since we have the expertise because the brand and the team...

Rajveer Singh: You will just be making suggestions, or will you be carrying out the website overhaul, the branding overhaul, the LinkedIn pages and all that? You will manage that for us, or would you just be suggesting what we should do?

Disha Arora: No, no. We have the expertise, that's why I'm suggesting, right? We are doing this for around 100 companies, so we know what to do. And this is just basic. Ideally, sir, hum PR se start karte hain: founder ke baare mein koi article, koi credible cheez zaroor honi chahiye. Hum bahut logon ke saath PR karte hain. But jab maine Yerik International dekha, I felt ki yahan bahut saari basic cheezein hain, otherwise is report mein I would definitely have added PR.

We are a 360 industrial marketing team. Hum sab dekhte hain: brochure ki quality, branding, visiting cards ki quality. Aapki manufacturing unit mein shoot ho raha hai, toh wahan kisne kaunsi T-shirt pehni hogi, kis colour ki. Website par kaunsa page hoga. We take care of everything. Toh aapko baaki logon se coordinate nahi karna padta. You connect with one partner, Giraffe Partners, and they take care of everything. Corporate event ho, brochure ya catalogue banana ho, we will take care of that. We have the expertise, the right people and the bandwidth.

Yerik International mein kahan se start karna chahiye, agar aap poochein, toh mera point hoga ki let's start with building a one-pager. Kyunki is website mein toh multiple pages lagenge. For example, main kisi bhi product page pe jaati hoon, yahan bahut saare products hain. Mujhe yeh bhi dekhna hai ki PDF mein actually kya aayega. Yahan "tweet" aa raha hai, and I don't know why it is written tweet, or why it is relevant there. Idhar bhi kuch dikh nahi raha. So there is no product detail or information. We will be redesigning it, one by one. But mujhe lagta hai Monarch Yerik Hydraulics Private Limited se start karke, next 7 to 8 days mein just a one-pager website banani chahiye, right? So you can also see the work and the timeline.

Rajveer Singh: Theek hai, let me explain. Monarch Yerik Hydraulics is a different management. Initially woh humara hi part tha, Yerik Hydraulics Private Limited. But recently uska humara ek JV ho gaya hai...

Disha Arora: Okay.

Rajveer Singh: ...with a Canadian company, toh woh ab unki jurisdiction mein hai, and they are managing their brand and all that activity. So my prime concern, if at all there is any interest, would be for the Yerik International side only, not for Monarch Yerik Hydraulics.

Disha Arora: Okay, okay. That makes my idea very clear, ki humein sirf Yerik International par focus karna hai. And since yeh badi website hai, isme kaafi pages hain, parts and everything, I will not commit that I can do this in 7 days, because it requires time. My fair

commitment would be that I can do this in the next 30 days.

Rajveer Singh: Theek hai. Pehle thoda apni company ke baare mein bataiye, madam: kitne log hain, kahan se operate karte hain, aapka modus operandi kya hai. Aur koi offer wagairah bhejiye, mujhe apni budgeting ke hisaab se chalna padega. Because, as you have rightly pointed out, humara iske liye budget allocation hi nahi hota.

Disha Arora: Okay.

Rajveer Singh: Humare liye yeh bahut least area hai, because humara B2B business already ek aise level par hai jahan abhi humein bahut zyada active marketing ki zaroorat nahi pad rahi.

Disha Arora: Mm-hmm.

Rajveer Singh: Humari capacities already full hain, aur hum international side pe bilkul active marketing nahi kar rahe hain.

Disha Arora: Got it. Completely understand. But mera fair counter yeh rahega, sir, ki you are doing it or not, that's a completely different game. Jo main keh rahi hoon, woh heavy marketing mein nahi aata. These are very basic matters jo dikhte nahi hain, but baad mein feel hote hain ki kaafi der ho gayi, there is no lead or no conversion, even after expos and corporate events. So it is completely fair from your side. What we can do, if you say, is a physical meeting where the founder of my company can meet the founder or decision-maker at Yerik International.

[A repeated passage in the recording is removed here.]

Rajveer Singh: Dekhiye, jaise maine kaha, abhi humein koi bahut compelling need nahi hai marketing ko lead karne ki.

Disha Arora: Uh-huh.

Rajveer Singh: At this moment, initial step par main sirf website ke upar thoda presence improve karna chahunga. That could be something we can explore. But outright marketing campaigns karna, aur branding ke liye sochna, that is still a far-fetched thing for us.

Disha Arora: Okay.

Rajveer Singh: Theek hai? Because there is no need. I just want to update my website. I want to reach a level jahan cheezein accurate hon, aaj ki date ki relevant information ho, kyunki website 10 saal purani bani hui hai.

Disha Arora: Right.

Rajveer Singh: Halanki product ranges abhi bhi kaafi had tak relevant hain, but uske baad humne kaafi progress kiya hai, infra bahut improve kiya hai. Toh woh saari cheezein thodi bahut highlight ho jayengi.

Disha Arora: Hmm.

Rajveer Singh: But the thing is that my infra, even after improvement, is completely bottlenecked on capacity.

Disha Arora: Okay.

Rajveer Singh: So I'm not pursuing any active leads at the moment. Kuch cheezein hum karte hain, apne existing clients par hi ja rahe hain. In fact, we are currently trimming our customer base: jo humare liye irrelevant ho gaye hain, ya jo business size offer nahi kar pa rahe, hum unko trim out kar rahe hain.

Disha Arora: Theek hai.

Rajveer Singh: So the thing is, active marketing abhi mere liye option nahi hai, or I would say that's not my focus area. Haan, online presence improve karne ke liye agar koi project karna chahenge, that could be the only area of collaboration right now.

Disha Arora: Okay, I completely get it. Mujhe yeh bhi jaanna tha ki website mein aap kya expect karte hain? Next 30 days mein humari taraf se sabse pehla point kya hona chahiye?

Rajveer Singh: Sabse pehle, ma'am, main apni IT team ke saath baat karunga, because I have to move this website from the local server that we are hosting it on right now.

Disha Arora: Right, right.

Rajveer Singh: Mujhe wahan se usko hatana hai aur IT team ke saath baat karke kisi different jagah shift karna hai.

Disha Arora: Okay.

Rajveer Singh: I am even open to building a fresh new website.

Disha Arora: Okay, that's great.

Rajveer Singh: But because my domain name is linked with them, woh problem hai. Isliye mujhe pehle IT team ke saath yeh explore karna hai.

Disha Arora: Hmm.

Rajveer Singh: Theek hai? Otherwise main is server pe rehna nahi chahunga, because these servers are not very secure. Abhi yeh locally Ludhiana mein kisi ke server par hosted hai. It is very nominal in cost, toh mujhe budget bhi dekhna padega ki main kaise woh budget allocate karwa paata hoon.

Disha Arora: Uh-huh.

Rajveer Singh: Toh woh ek part hai jo mere end par hona hai, aapke end par nahi. Uske baad next step yeh hai ki connection improve karke, update karke...

Disha Arora: Hmm.

Rajveer Singh: ...woh cheez karna, aur LinkedIn profile ko thoda improve karna.

Disha Arora: Got it. So we will be going ahead with this as well. Let's recap: what are the things from your end and what are the things from my end? I understood...

Rajveer Singh: Aap apna proposal bhejo, usme se we can cherry-pick what we need at this moment, hai na?

Disha Arora: Uh-huh.

Rajveer Singh: Haan.

Disha Arora: To be very honest, abhi tak koi proposal bana nahi hai, kyunki woh toh aapse baat karke hi pata chalta ki aapki requirements kya hain. Since we are looking at two things, one is the website and second is the LinkedIn presence, jab tak website banti hai aur website ka decision hota hai, we can go ahead with managing LinkedIn and at least correct those things. I can send you LinkedIn audit forms. Hum har ek ki profile audit kar sakte hain.

Rajveer Singh: Aap kahan se operate karte ho, ma'am? Aapka office kahan hai?

Disha Arora: Let me tell you. The company is Giraffe Partners, and it's the mother company. The offices are in Delhi, Chandigarh, Dehradun and Abohar in Punjab. The big offices are in Delhi and Abohar. Our primary expertise is manufacturing and industrial marketing, and institutional marketing, which is LinkedIn and PR. This is our founder, Mr. Lovish Kalani. We have worked with around 50 to 100 companies. This is our team, and of course there are more people. This is our address and what we do.

[Disha shares the Neev Seeds case study]

Let me show you a case study. We have agricultural clients as well. This is Neev Seeds, jisko hum 3 saal mein yahan tak lekar aaye hain. Distributors se lekar retailers tak humne ek poora system create kiya hai. Pehle inke expos aise lagte the: basic white shirts and

mixed branding. Phir humne new packaging launch ki. Jaise inke SKUs badhte gaye, humne har cheez ko inke saath evolve kiya: trademark, logo, website, distributor forms. Since it's a farmer-oriented company, humne grassroots level tak, gaon tak jaakar marketing ki. These are the campaigns led by us.

Now the expos look like this: everyone is wearing a branded T-shirt. The retailers' shops look like this. Is page se hum around 100k organic numbers tak pahunche hain. These are the local ads we ran to maintain relevance. Jab farmers WhatsApp par reach out karte hain, toh automatic WhatsApp workflows unko reply karte hain, aur area ke hisaab se distributor ka number aur details apne aap mil jaati hain. This automation runs 24/7. These are retailer testimonials, and we have farmer testimonials as well.

Basically, Neev Seeds ko, sir, humne full-on brand banaya hai. Pehle inka social media non-existent tha; these are the organic numbers we have reached so far, and it's still going. We are also building a website purely for our industrial marketing case studies, but that is in progress, since we have many clients and leads to take care of. So this is the basic information about my company. We are a 360-degree manufacturing and industrial marketing team, where we handle everything, from website to LinkedIn to...

Rajveer Singh: That's good enough, I have understood your profile. Jo maine abhi do areas bole hain, aap apna pura portfolio bata do ki kya-kya karte ho. Usme se hum kuch pick kar lenge ki initial stage par kya karna chahenge, aur explore karenge ki uski cost relevance kya hai. Aur agar main budget allocate karwa leta hoon, then we can initiate. I was really thinking of overhauling the website for quite a long time now, but aage badh nahi pa raha tha, because jaise maine bataya, humari koi immediate need nahi hai marketing push karne ki. We are already choked on capacity. But yes, I would like to upgrade the website and improve the web presence. Not actively seeking leads immediately, but at least preparing the ground for any future launches.

Disha Arora: That completely makes sense. Sorry, sir, just one question: what do you expect from my proposal? Is it about numbers, or a proposal of what we can actually do with your website, with the timeline?

Rajveer Singh: Haan, wahi aap bataiye ki aap kya propose karte hain: website mein kya sudhara jaaye, kya-kya cheezein ki jaayein, aapka cost kya rahega aur timeline kitni rahegi.

Disha Arora: Okay, okay.

Rajveer Singh: And usme se humse aapko kya-kya expected rahega.

Disha Arora: Okay, theek hai.

Rajveer Singh: Because now that you have triggered this, there is an upcoming show in November. I am not sure if my company will allocate a budget for this, but if they do and we agree to move forward, my idea would be to have at least the website improvement done within 1 month.

Disha Arora: Okay, so the timeline is clear: within 1 month.

Rajveer Singh: Within a month. Because the new show is where we are putting up an exhibition display. If I can launch a website before that, it would be great.

Disha Arora: Okay, I completely understand. Apart from that, ek clear baat bolti hoon: yahan bohot saare products hain, so there will be some involvement required from your side on what goes on the website. However, we have the expertise...

Rajveer Singh: Coordinate karegi, ma'am. Meri team hai, woh coordinate karegi.

Disha Arora: That would be great. So let's connect in another 2 days, jab main apni taraf se proposal lekar aati hoon. Tab tak aap confirm karke bata sakte hain ki Yerik International ka domain aapki side se free hai, ya humein naya build karna hoga?

Rajveer Singh: Let me check with my IT people. Is call ke baad main unke saath meeting kar leta hoon, and let me see how we can do it, because I would really like to move it out of Ludhiana while retaining the domain name. At least the hosting has to move out from here.

Disha Arora: Okay, no worries, we will take care of that. Agar meri taraf se kuch pending hai, or anything you want to flag that I should keep in mind?

Rajveer Singh: Nahi, abhi toh flags humari taraf hi hain, ma'am. Kaafi kuch mujhe apne andar karna padega. The only thing is that once I get your proposal, that gives me a ground to reach my management and take approvals, right?

Disha Arora: Yeah, that makes sense.

Rajveer Singh: Woh bhejiye, phir main aage baat karta hoon.

Disha Arora: Done. From my end, I will send you a proposal within 2 days, as soon as possible.

Rajveer Singh: Yeah, sure, perfect.

Disha Arora: Thank you so much, sir. Thank you for your time.

Rajveer Singh: Thanks, thanks.
